

5 unusual subjects at the university

cheap essay writing service

"Studying trash at Santa Clara.

Santa Clara University specializes in trash, among other things. Indeed, there is a science course that deals with a detailed study of trash of various origins.

The questions that this discipline includes are vital, such as why and when trash begins to rot, at what point and for what reason there is an unpleasant odor, and what environmental impact trash has on the environment.

In this case we are not only talking about household garbage, we are also interested in industrial and nuclear waste, atmospheric emissions.

A subject seemingly irrelevant to the future fate of graduate students, but still of tremendous importance in science, especially of interest to scientists who are building theories about zero-waste production.

The Magic School in California

In sunny California, there is a Gray School of Magic, where the principal looks like a real wizard. This themed school is a precursor to the Harry Potter saga, reproduced in magical style.

This school has been recognized as an academic institution, and the curriculum includes 16 of the most unusual disciplines of the world of magic and wizardry.

These include working with a magic wand, making wizard potions, talking to animals, learning to fly a broomstick, spells, and Alchemy, presented in theoretical and practical directions.

This closed-type school has about 400 students, a quarter of whom have already reached adulthood.

In the past, this school was not popular, and was perceived more as a feature of the local area.

After the release of the Harry Potter adventure saga, the ratings for the Wizarding School skyrocketed.

Bagpipes in Pennsylvania.

Carnegie Mellon University, located in one of the American states of Pennsylvania, provides a special course on playing the bagpipes, which began its existence back in 1990.

Scottish music is specific, so the popularity of this specialty is low, but everything is in the best traditions of Scotland - bagpipes, skirts kilt, Scottish terrier as a symbol of the school.

At pairs it is possible not only to get acquainted with national music of Scotland, but also to learn about history of its origin, meanings, to learn how to play the most common sounds.

Lawn Management at Michigan State

Michigan State University has a very strange specialty that allows you to manage lawns after you graduate.

Students in this department are creative people who transform sports fields, golf courses, and city parks into true masterpieces of art in the future.

Despite the specificity of the specialty, its popularity grows every year, the more so because graduates earn good money, become famous and irreplaceable professionals in their field.

Former students are known to work successfully in the World Series of Baseball today.

Austrian sex school

The Austrian School of Sex is world famous, and its main goal is to teach and improve the sexual education of students.

In this case, it is not only about the theoretical part, but also about practice.

Students will be able to learn about the history of sex, the perception of sex in different cultures, modern sexual theory, innovations and innovations.

You have to study for five semesters and additionally take three intensive courses. The course is specific, but nevertheless enjoys notable popularity among today's youth.

In domestic universities such a subject is definitely not found, the only thing you can count on, human anatomy and sexual education of adolescents.

Conclusion: Summing up, it remains only to add that there are many amazing things in the world, and higher education often throws up the most unexpected surprises.

As for domestic universities, then there is much more modest and conservative, and among the strangest subjects - strength of materials, probability theory, military training, ecology and sociology. Learn them definitely have to, otherwise higher education, alas, not get.

These are the most unusual subjects in the world's universities, which are of interest to all students, but not everyone is ready to study them within the walls of their university.
